Original Brass Designs By Rome

#2302 Flowers Sundial

(10" diameter) solid brass w/verdigris highlights
A bouquet of welcoming chrysanthemums adorn this beautiful brass sundial. The motto, "Flowers are lovely, love is flowerlike" was written by the 18th century English romantic poet, S.T. Coleridge. The bold yet simple gnomon is a tasteful complement to the dial face.

#2303 Happiness Sundial

"The time to be happy is now. The place to be happy is here" reads the life affirming motto on this sundial. The words are enveloped by a block print style floral design that gives a traditional feeling to the sundial.

#2304 Rosette Sundial

(10 1/2" dia.) solid brass w/verdigris highlights
"I am silent without the sun," reads the motto on Rome's strikingly elegant solid brass Rosette sundial. The ornamentation and fine detailing pay reverence to European gothic design; while a bold polished gnomon shoots skyward.

#2306 Grapevine Sundial

(7 1/2" dia.) solid brass w/verdigris highlights
A perfect sundial for the wine lover, this solid brass design features ripe grapes hanging on the vine and surrounded by leaves. The surface is richly textured and evokes a naturalistic style. Looks best with our smaller wrought iron stands.

#2307 Kiss Of The Sun Sundial

(10" dia.) solid brass w/verdigris highlights
This dial is inscribed with Dorothy Frances Gurney's cherished poem, "The kiss of the sun for pardon, the song of the birds for mirth, One is nearer God's heart in a garden than anywhere else on earth." A fitting sundial for the gardener.

#2308 Grow Old With Me Sundial

(10" dia.) solid brass w/verdigris highlights
Robert Browning's poem "Grow old along with me, the best is yet to be" is probably the most loved quotation on our sundials. This polished brass sundial has a knot design and a beautiful Irish claddagh centerpiece, symbolizing everlasting love. A great anniversary or wedding gift.

Solid Brass Sundials

We choose brass for the majority of our sundial designs because it's a material without compromise. As with bronze, brass is a favored medium of artisans throughout the world. For a moderate price, brass gives us an heirloom quality sundial that we can trust will last for centuries. Naturally non-rusting, brass requires no upkeep. Simply let it age gracefully in the garden where it will, overtime, develop a lovely patina finish.

Most of our brass designs have a two-tone finish with polished brass highlights over a darker patina background. This gives the sundial a naturally aged look with sparkles from the polished areas.

Cast Iron Sundials

In the 19th century a trend developed in Britain and America towards a more affordable alternative to bronze. Cast iron became this alternative material and was responsible for the first garden art to be mass-produced for the middle class. Although affordable, the trade off with cast iron is that it rusts; of course these days, the rust finish in garden art has a large following.

Cast Resin Sundials

Rounding out our selection of sundial materials are these five designs made from cast resin. Similar to casting concrete, these sundials are made by pouring a solution of finely crushed stone and resin into a mold and curing until solid. They are then applied with a hand painted finish. Resin sundials are our most affordable sundials and serve as a nice low price point gift.

In fact, the typical retailer of Rome sundials will sell a pedestal with over half of their sundial sales.

Rome Pie Irons™

Open Fire Sandwich & Snack Makers

Way back in 1964, we began making an item which has enhanced gatherings around the campfire for generations. Pie Iron cooking is outdoor campfire fun at its essence. So simple to use, yet so delicious and versatile. Just take two slices of bread (buttered on the outside), fill with jam, cheese, meat etc.. Place inside the cooking cavity and close. Hold over the fire for a few minutes and you have a wonderful toasted treat.

It all started for us with the basic round and square designs and has grown to include unique variations such as the Dog'n Brat cooker and Waffle Iron. All of the Irons on these two pages feature extra long rods and handles for use over an open fire (firepit, campfire or fireplace.) For BBQ or stovetop use, we suggest using our Jaffle Irons.

Camp Bread Baker

Cast Iron Cooker Wraps & Bakes Bread

You know the saying really holds true that "everything tastes great when you're camping."

Well how about adding some great tasting fresh baked bread to that meal? The new Rome camp bread baker is a unique cast iron cooker that allows you to bake a wide variety of quick or leavened breads in only 10 minutes.

Similar in concept & operation to our famous pie irons, the bread baker cooking cavity is 12" long x 1 1/2" deep and is connected by rods with handles. To use, simply butter or oil the cavity, fill half way with dough and cook over a moderate fire until done.

The bread baker is also fantastic for cooking wraps, roll-ups, burritos and even kielbasa sausage.

Australian Style Jaffle Irons

Sandwiches & Pies On The BBQ Grill

Jaffle Irons Make Tasty Pies & Sandwiches

The tradition of making pocket treats, pies and sandwiches over fire or charcoal briquettes is not unique to North America. Many countries have their own version of the Pie Iron along with their own favorite recipes which reflect their culinary tastes. In Australia and Indonesia, the Jaffle Iron is the tool of choice. While people camp with Jaffle Irons, they're just as popular on the barbecue or stovetop. We're pleased to evoke the relaxed spirit of the down-under jaffle iron in our square and round cast iron designs. The short handles are perfect for use on a BBQ or stovetop.

Family Campfire Skillet

Get The Kids Involved With Outdoor Cooking

With a name like "Family Campfire Skillet", you might be surprised to know that it's only 6" diameter and not some big old 18" frying pan. How are you supposed to feed a family with that? Well actually that's not the point. The idea behind the Family Campfire Skillet is to help introduce the concepts and ideas of outdoor cooking to kids with the help of their parents or older siblings. By taking a small cast iron skillet and attaching a long wood and steel handle, the child can safely try cooking food like eggs, sandwiches and pancakes while mom and dad help by flipping the food and the more dangerous aspects of outdoor cooking. The child cooks by standing and holding onto the long angled wood handle, safely away from the heat. Try one for everyone in the family.

#68

#66

When cooking fish and burgers on a grill it can be difficult to flip the food without tearing and flaking the fish or jabbing at the meat which turns it from browned, yet juicy into dry & overcooked. A grill basket allows a secure way to grill and flip your food without the poking, lifting and grabbing. The various designs offered by Rome provide the appropriate wire nest for everything from veggies to chops to chicken and seafood.

Although great for the bbq grill, the long wire handles make cooking over a campfire or firepit convenient and reliable.

Outdoor Pizza Grill

Mama Mia I'm A Grilling A Pizza Pie!

Wood-fired pizza over a campfire, firepit or bbq is embarrassingly simple with Rome's Outdoor Pizza Grill. Simply place your pizza on the grill surface and cover completely (top & bottom) with aluminum foil. The unique raised edges of the pizza grill holds the foil a few inches over the surface of the pizza, creating an oven effect and promotes even heat distribution. After about 10 minutes, the crust will be browned, the cheese bubbly and the smell, enticing. Peel back the foil, slice and enjoy your grilled pizza. Works with frozen pizza, store bought or homemade crusts. Instructions included on vibrant packaging card.
